- **Zone C, Zone X** Areas determined to be outside 500-year floodplain determined to be outside the 1% and 0.2% annual chance floodplains.
- **Zone B, Zone X500** Areas of 500-year flood; areas of 100-year flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 100-year flood. An area inundated by 0.2% annual chance flooding.
- **Zone A** An area inundated by 1% annual chance flooding, for which no BFEs have been determined.
- **Zone AE** An area inundated by 1% annual chance flooding, for which BFEs have been determined.
- **Zone AH** An area inundated by 1% annual chance flooding (usually an area of ponding), for which BFEs have been determined; flood depths range from 1 to 3 feet.
- **Zone AO** An area inundated by 1% annual chance flooding (usually sheet flow on sloping terrain), for which average depths have been determined; flood depths range from 1 to 3 feet.
- Zone AR An area inundated by flooding, for which BFEs or average depths have been determined. This is an area that was previously, and will again, be protected from the 1% annual chance flood by a Federal flood protection system whose restoration is Federally funded and underway
- **Zone A1-A30** An area inundated by 1% annual chance flooding, for which BFEs have been determined. .

Area Not Included

(ANI),(N) - An area that is located within a community or county that is not mapped on any published FIRM.

Zone D - An area of undetermined but possible flood hazards.

Undescribed

- (UNDES) Area of Undesignated Flood Hazard. A body of open water, such as a pond,lake, ocean, etc., located within a community's jurisdictional limits, that has no defined flood hazard.
- **Zone VE** An area inundated by 1% annual chance flooding with velocity hazard (wave action); BFEs have been determined.
- **Zone V(1-30)** Costal flood with velocity hazard (wave action); BFEs have not been determined.
- FWIC An area where the floodway is contained within the channel banks and the channel is too narrow to show to scale. An arbitrary channel width of 3 meters is shown. BFEs are not shown in this area, although they may be reflected on the corresponding profile. (Floodway Contained in Channel)

- An area where the 1% annual chance flooding is contained within the channel banks and the channel is too narrow to show to scale. An arbitrary channel width of 3 meters is shown. BFEs are not shown in this area, although they may be reflected on the corresponding profile. (1% Annual Chance Flood Discharge Contained in Channel)
- 500IC An area where the 0.2% annual chance flooding is contained within the channel banks and the channel is too narrow to show to scale. An arbitrary channel width of 3 meters is shown. (2% Annual Chance Flood Discharge Contained in channel)
