New home
construction

Real Estate Industries: We assume that commissions, fees and moving expenses, or income to real estate industries, associated directly with the purchase are about 9% of the median home price.

Expenditures related to home purchase: Furniture and remodeling expenses are estimated to be about \$5,460 in 2023, based on the NAHB figure.

https://eyeonhousing.org/2022/06/how-a-home-purchase-boosts-consumer-spending-2/?_ga=2.230040799.2124019150.1680586014-1983402015.1678288982

Multiplier effect: The multiplier effect accounts for the fact that income earned in other sectors of the economy as a result of a home sale is then re-circulated into the economy.

New construction: Additional home sales induce added home production. Typically, one new home is constructed for every six existing home sales. Thus, for every existing home sale, 1/6 of a new home's value is added to the economy.
