Monthly Indicators

May 2023

Existing-home sales slid for the second consecutive month, falling 3.4% nationwide as of last measure, according to the National Association of REALTORS® (NAR), as higher interest rates continue to impact buyer affordability. Sales are down 23% compared to the same period a year ago, while contract signings dropped 20.3% year-over-year. With sales cooling, buyers in some parts of the country have found relief in the form of declining sales prices, which are down 1.7% year-over-year nationally, although more affordable markets continue to see price gains.

New Listings decreased 18.5 percent for Single-Family Detached homes and 23.9 percent for Single-Family Attached homes. Pending Sales decreased 11.7 percent for Single-Family Detached homes and 17.1 percent for Single-Family Attached homes. Inventory decreased 2.8 percent for Single-Family Detached homes and 30.6 percent for Single-Family Attached homes.

The Median Sales Price increased 3.2 percent to \$351,750 for Single-Family Detached homes and 10.0 percent to \$275,000 for Single-Family Attached homes. Absorption Rate increased 30.0 percent for Single-Family Detached homes but decreased 16.7 percent for Single-Family Attached homes.

While fluctuating interest rates have pushed some buyers to the sidelines, a shortage of inventory is also to blame for lower-than-average home sales this time of year, as current homeowners, many of whom locked in mortgage rates several percentage points below today's current rates, are delaying the decision to sell until market conditions improve. With only 2.9 months' supply heading into May, available homes are moving fast, with the typical home spending just over three weeks on the market, according to NAR.
